

READY TO START REDUCING FUEL COSTS?

afdpetroleum.com/portable-fuel-station

START SAVING TODAY.

If your company has a vehicle fleet or uses fuel in its everyday operations, you already know that fuel is one of your highest expenses. Between inaccurate reporting and fluctuating fuel prices, it's difficult to predict what your fuel expenses will be from month to month. You need a better way to track your employees' fuel usage and save your company time and money. **We can help.**

Introducing the PFS

Working with our engineers and designers, we built the Portable Fuel Station (PFS) to fit small to mid-size businesses that need easy on-site fuel access. The PFS enables users to fill up their vehicles on site, bringing travel time down to zero.

Each user gets a key fob that gives them access to the unit. When they fill up their vehicle, the PFS records the time, date, user ID, vehicle ID, distance travelled, and fuel taken. You can download these reports at any time using the tank's reporting software, reducing time spent on fuel-related tasks down to just 20 minutes of management every month.

No other all-in-one product on the market offers the same level of tracking, reporting, and control at such an affordable price.

Features

The PFS offers all the features of a larger, more costly fuel system in a compact, cost-effective portable tank. The station comes in 13,000L and 20,000L capacities. We designed the unit with features like an overfill prevention valve, audible and visual alarms, an auto-shutoff nozzle, and breakaway couplings for safer refuelling. It is also double walled for added safety, so if one wall is damaged, the other will keep fuel from leaking out.

FAST FUELLING

The PFS enables you to control your fuel usage by setting access limits. Each user receives an access fob that they can scan to dispense fuel and automatically create a usage report.

SIMPLE SETUP

Our team will come to your site to install the station, provide employee training, and show you how to pull reports. We'll also work with the appropriate associations to have your tank permitted and registered.

AUTOMATIC REPORTING

Want to save fuel and say goodbye to time-consuming expense reports? The PFS's built-in automated reporting system monitors, controls, and tracks fuel usage to show you who used how much fuel and when.

ZERO MAINTENANCE

The PFS's automated system monitors your tank and notifies us when it needs to be refilled so we can take care of it. You'll never have to think about re-fuelling your tanks or running out of fuel ever again.

Business Benefits

Here are just some of the ways the Portable Fuel Station can make your job easier.

- ✓ Reduce labour costs.
- ✓ Reduce fuel expenses.
- ✓ Eliminate fuel waste.
- ✓ Get accurate fuel reports.
- ✓ Track fuel usage.
- ✓ Accurately forecast fuel expenses.
- ✓ Automate your tank refuelling.

Find out how much you could save.

Purchase Agreement

The PFS is available to buy, rent, or rent to own. Each unit comes with a required three-year fuel supply agreement. Purchased units also come with a one-year mechanical warranty, a five-year structural warranty, and an after-warranty service package designed for your individual needs. The unit has a life cycle of 20 to 25 years, depending on how it's used and maintained.

Three-Year Supply Agreement

With your three-year supply agreement, we provide you with competitive fuel prices throughout your contract. AFD also monitors your fuel levels and automatically fills up your tank so you never have to worry about refuelling.

Schedule A Free On-Site Demo Of The PFS

We'll bring the Portable Fuel Station right to your work site for a free on-site demo. You'll learn how the PFS works and how you can start saving on fuel costs right away.

Don't wait to schedule a time! Visit afdpetroleum.com/portable-fuel-station or call **1.800.926.3835** to book, and we'll bring the PFS out for your FREE demo!

About AFD Petroleum

Established in 1989, AFD Petroleum is a leading independent supplier of bulk fuel, lubricants, and on-site storage systems across western Canada, Alaska, and Texas.
